OSC Region 6

Dear Mr. Fife,

We have been retained by a third party with an interest in the response actions underway at the sinkhole. The recently release report titled "Aerial Chemical Survey, Bayou Corne Sinkhole Survey Assumption Parish, La." indicates that aerial photography collected as part of this survey is "available for viewing through the Google Earth display application using the link provided under separate transmittal or through ESRI by downloading the imagery through the Secure FTP site (access available upon request)."

Please advise how we can obtain access to these images.

Please contact me if you have any questions.

Best Regards,

Grant Mershon
